A Software developer with experience across the full range of software development life-cycle. Experience with working across multiple platforms and technologies. Currently working as a developer in Deloitte as Salesforce Developer. This role encompasses support of existing applications, as well as the design and implementation of new functionality with existing products, as well as the introduction of new application where appropriate. Has extensive experience with the design and development of the processes in support of distributed application development, including introduction of autonomous processes and test-driven development. Knowledge in Java development, using a range of development tools (Maven, Ant and Gradle). Has extensive experience with using Agile methodologies to implement software. Have used multiple applications (Scrum, Kanban, Tracker) in different team scenarios. I have worked both on the server side and on the client side.

PROFESSIONAL EXPERIENCE LWC, Aura, Salesforce, Apex, JAVA/J2EE, Spring, Swing 8 Years+

Deloitte USI Specialist Senior (Leading a Team of 8 members) Apr'17-Current

- Working on Salesforce technology, took ownership of optimizing Apex code for full org.
- Converted VFPages to Aura and Lightning web components. Extensively worked on Aura and LWC.
- Created Salesforce Review Tool as an accelerator using Java(Spring Boot), AngularJS, HTML5 and mongoDB.
- Created Apex Editor tool as an accelerator using Java(Spring Boot), AngularJS, HTML5.
- Hosted Platform Event workaround on Heroku. This is to overcome platform event governor limits.
- Developed <https://apexeditortooldev.herokuapp.com> , for writing apex code and many more Spring Boot Applications.
- Created delta deployment tool, Jenkins + Git + Shell Script, to deploy only incremental changes to higher orgs. Improved CI/CD process and got awarded for it. Hosted it on Heroku too.
- Working on healthcare domain for a US based company, responsible for code review and code optimization and developing complex components in LWC and Aura.

Caterpillar Electronics R&D Software Developer May'14-Apr'17

Product: CAT MineStar

- Working on fleet management module that controls and commands a mine site.
- Web application development where I used log files to pull up performance metrics show using Google Visualisation API.
- Developed a highly scalable and reusable application which allowed different customers to configure the software according to their use. Used Flex, Java, Spring, Hibernate and Python.
- Developed Liquibase difference generator tool, which finds out the difference between in database schema by comparing the current database schema and the hbm files in the application.
- Following Agile Methodology using Atlassian Tool (JIRA/WIKI and Crucible).
- Used Java/J2EE, Spring, Hibernate and Web Services to develop the application and manually created Spring Object Servers.
- Built infrastructure and automated code quality mechanism to have constant check on quality of the product. (Jenkins, SonarQube, and Collabnet SVN)
- Working on core framework for MineStar architecture using advanced design patterns.
- During the BHP upgrades for MineStar I developed and deployed important patches and save some green money for CAT.
- Working also as a Swing Developer for MineStar from Bangalore Team.
- Working on all core products of MineStar (Fleet , Health, Terrain, Command).
- Developed core part of Autonomous Drilling Systems as a single member from MineStar Bangalore Team (JST library).

SDSoft Solutions Pvt Ltd Software Developer Oct'12-Apr'14

Client: travelnow

- Implemented servlets with controller logic.
- Implemented JDBC for Persistence Logic
- I also created a small java application to unzip files and place them to different folder based on the file extension which was previously done manually.

SKILL SET

Programming Languages	Apex, JAVA, HTML(Basic) , Python(Basic), JavaScript
Technology	LWC, Aura, Apex, Core Java, Multi-threading, J2EE, Spring, Hibernate, XML, JSON, HTML5, Swing, JMX, Mongo DB, Android, Spring Boot.
Server Used	DHCP, MAIL servers
Operating System	Windows (98, NT, XP,7,8.1, 10), Linux(BackTrack, Kalilinux)
IDE Used	IntelliJ, Eclipse, ApexEditor

ACADEMIC QUALIFICATIONS

	Instrumentation &			2012
